Summary

Hi I am Amos, a forward-thinking Software Engineer with a background of working effectively in dynamic environments. I am Fluent in the Javascript ecosystem of programming languages used for web development. I am also Proud team player focused on achieving project objectives with speed and accuracy.

Acquired Skills

- HTML, CSS, JavaScript, NodeJS, Express
- React and Redux, React hooks
- Styled components, MaterialUI
- Mongo, PostgreSQL, Oracle
- Java, Spring, Gradle, Maven, Eclipse
- Visual Studio, NPM
- Python
- SQL
- Heroku, Docker

Experience

Kyneph solutions

Jan 2020 - Present

Software Engineer
Atlanta, GA

- Develop and add features to a medical claims app built in React and NodeJs
- Design and build tables, procedures, and views in SQL based on user requirements
- Convert the business requirements to frontend React
- Write REST API's within a micro services architecture
- Use Git to manage projects.
- Technologies used: React, Redux, NodeJs, MaterialUI, Postgres
- Liase with tester and developers to test complete user stories
- Support continuous improvement of the application

Florida Blue

June 2019 - Nov 2019

Software Engineer
Jacksonville, FL

- Develop and maintain claims workflow application using the following technologies: Java, Spring boot, React, Liquibase, Jenkins, Openshift, myBatis, SQL, Oracle
- Interact with BSA's in grooming and design meetings
- Liase with testers to test complete user stories, as well as fix defects
- Write DML and DDL scripts using liquibase
- Write queries using mybatis persistence framework
- Writing well-designed, efficient, and testable code
- Write REST API's within a micro services architecture
- Used Git to manage projects.
- Deploy merged code using Jenkins
- Deliver user stories within the deadline period
- Support continuous improvement

Home Depot

Feb 2018- June 2019

Software Engineer
Paces Ferry, Atlanta, GA

- Develop monitoring dashboards which help to monitor App performance issues such as status, latency, errors, volume.
- Used Git to manage projects.
- Deploy merged code using Concourse
- Plan stories with BA in grooming sessions
- Developed and maintained Home Depot Exteriors Workflow app, using the following technologies: Java, Spring Boot, SQL, Activiti BPM, Concourse, MySql, Eclipse, Git, AngularJs, Javascript, ReactJs, NodeJs, PCF

Mobile App Hero

Sept 2017 - Feb 2018

Mobile app developer (internship)
WeWork Tower Place, Atlanta, GA
design and develop apps using Javascript frameworks, React and React native, firebase, NodeJs.

Education

DigitalCrafts coding bootcamp
Buckhead, Atlanta
Chattahoochee technical college
Marietta, Georgia
Associates degree computer programming
University of Canberra
Canberra, Australia
Bachelor business management and MIS

Feb - June 2017

2014 - 2016

2003 - 2006
