

# Amos Gichero

## Software Developer

Email: amosgichero@gmail.com

Website: amosgichero.com

### Summary

Hi I am Amos, a forward-thinking Software Engineer with a background of working effectively in dynamic environments. I am Fluent in the Javascript ecosystem of programming languages used for web development. I am also Proud team player focused on achieving project objectives with speed and accuracy.

### Acquired Skills

- HTML, CSS, JavaScript, NodeJS, Express
- React and Redux, React hooks
- Styled components, MaterialUI
- MongoDB, PostgreSQL, Oracle
- Java, Spring, Gradle, Maven, Eclipse
- Visual Studio, NPM
- Python
- SQL
- Heroku, Docker
- Git

### Experience

#### Kyneph solutions

Software Developer  
Atlanta, GA

Jan 2020 - Present

- Develop and add features to a medical claims app built in React and NodeJs
- Design and build tables, procedures, and views in SQL based on user requirements
- Convert the business requirements to frontend React
- Write REST API's within a micro services architecture
- Use Git to manage projects.
- Technologies used: React, Redux, NodeJs, MaterialUI, Postgres
- Liase with tester and developers to test complete user stories
- Support continuous improvement of the application

#### Florida Blue

Software Developer  
Jacksonville, FL

June 2019 - Nov 2019

- Develop and maintain claims workflow application using the following technologies: Java, Spring boot, React, Liquibase, Jenkins, Openshift, myBatis, SQL, Oracle
- Interact with BSA's in grooming and design meetings
- Liase with testers to test complete user stories, as well as fix defects
- Write DML and DDL scripts using liquibase
- Write queries using mybatis persistence framework
- Writing well-designed, efficient, and testable code
- Write REST API's within a micro services architecture
- Used Git to manage projects.
- Deploy merged code using Jenkins
- Deliver user stories within the deadline period
- Support continuous improvement

#### Home Depot

Software Developer  
Paces Ferry, Atlanta, GA

Feb2018- June 2019

- Develop monitoring dashboards which help to monitor App performance issues such as status, latency, errors, volume.
- Used Git to manage projects.
- Deploy merged code using Concourse
- Plan stories with BA in grooming sessions
- Developed and maintained Home Depot Exteriors Workflow app, using the following technologies: Java, Spring Boot, SQL, Activiti BPM, Concourse, MySql, Eclipse, Git, AngularJs, Javascript, ReactJs, NodeJs, PCF

#### Mobile App Hero

Mobile app developer (internship)  
WeWork Tower Place, Atlanta, GA

Sept 2017 - Feb 2018

design and develop apps using Javascript frameworks, React and React native, firebase, NodeJs.

### Education

#### DigitalCrafts coding bootcamp

Buckhead, Atlanta

Feb - June 2017

#### Chattahoochee technical college

Marietta, Georgia

2014 - 2016

Associates degree computer programming

#### University of Canberra

Canberra, Australia

2003 - 2006

Bachelor business management and MIS
